CoinAlpaca Whitepaper

Version 1.1

What is CoinAlpaca?

CoinAlpaca is a community-based Proof-of-Stake/Masternode cryptocurrency developed to target charities for both the human race as well as the cute Alpaca animal species. CoinAlpaca will be a versatile ecosystem, offering investors more than just the good vibes of charity work. The developers at CoinAlpaca have challenged themselves to the task of delivering an ethically sound cryptocurrency that will provide a fruitful opportunity for their investors and provide some much needed good news for those around the world who desperately need it.

The team at CoinAlpaca recognizes the hard time currently had by all, both in cryptocurrency and in the real world. CoinAlpaca wants to bring back some good news to the crypto-verse. Through partnership opportunities, third-party payment integration, and an upcoming merchandise store, the CoinAlpaca brand will extend well beyond digital assets. These avenues will also provide additional revenue that will prove vital to help complete charitable objectives for every two and four-legged friend in need.

CoinAlpaca Use Cases

With a variety of features and offerings in mind, CoinAlpaca will benefit from a diversified valuation. This will prove to be a healthy approach for the long life of the project.

Ideally, a currency is created to be utilized. CoinAlpaca will focus this form of utility on the niche industries that are connected to our future partners and their charitable events. CoinAlpaca will be a feature payment option for them as well as sponsored farms and sanctuaries that are directly affected by the project.

Additionally, in order to increase revenue for the charitable work CoinAlpaca will do, the CALP coin will be used in an online merchandise store where investors and supporters of the project will be able to purchase an array of items. These items will include: shirts, alpaca wool jackets, hoodies, hats and caps, and much more.

The Future with CoinAlpaca

CoinAlpaca may seem like a niche project, focused on a cute animal that everyone loves. However, the truth is that the CoinAlpaca team has a long, varied plan for the future of the project and the coin. Payment integration and merchandise sales are only the tip of the iceberg.

Partnerships with other charitable organizations and NGOs around the world will spread the CoinAlpaca brand and mission to every corner of the globe. UI development on the CoinAlpaca website will create an interactive portal for fundraising efforts.

Research and Development will play a major role in CoinAlpaca's long term future. Finding the most efficient and humane ways to care for our furry friends as well as how to best create self-sufficient sanctuaries. Tourism is one of the most directly impactful ways of raising funds for consistent, long-lasting care and CoinAlpaca will spend a significant amount of resources of building platforms for tourism purposes.

CoinAlpaca Coin Specifications

Name: CoinAlpaca
Ticker: CALP
Algorithm: Quark
Type: PoS/MN
Default Port: 22807
Max supply: 111,111,111 CALP
Total Supply after 6 Years: 54,161,110 CALP
Premine: 11,111,111 CALP (10% of Max Supply)
MN Collateral: 11,111 CALP
Block Time: 60 seconds
Stake Age: 60 minutes

CoinAlpaca Block Reward Structure

Block Heights	Block Reward	Masternode Payout 80%	Staking Payout 20%
1 - 1050	10582.02	Premine Blocks	Premine Blocks
1051 - 5000	1	0.8	0.2
5001 - 25000	10	8	2
25001 - 100000	24	19.2	4.8
100001 - 1050000	20	16	4
1050001 - 2100000	14	11.2	2.8
2100001 - 3150000	7	5.6	1.4
> 3150000	2.5	2	0.5
